

Storage

FOR LAW FIRM

TOP LAW FIRM USES MOBILE STORAGE TO TRIPLE STORAGE CAPACITY AND PRESORT REFILES

- WHAT:** The Washington, D.C., office of Foley & Lardner, one of the nation's top 10 law firms.
- PROBLEM:** The firm was completely out of patent filing storage space in its intellectual property central file room. There was a maze of static shelving that was overcrowded. Records were jammed on the system making retrieval difficult.
- OBJECTIVE:** Make the file area more organized and efficient and allow a presort capability.
- SOLUTION:** A file system was designed that organized and condensed the legal patent files.
- PRODUCT:** Spacesaver StoreFront® electric, mobile storage system.

UNIQUE FEATURES

- End-aisle, presort shelves.
- Indexed listing of the files on the face panel.
- Shelving assignments laid out with a grid system for logical file assignment.
- Mobile system oriented in the room so aisles face work area.

BENEFITS

- Staff is confident that files are kept safely in an organized shelf location.
- All users are safe, regardless of their level of knowledge about how to work the system.
- Staff can select more optimal times during the day for file-backs.
- Ease of reading the index listing.

"The Spacesaver mobile system exceeded our goals in saving space," explained Sandra Cunningham, office administrator in charge of all non-legal functions at the office. "Space in Washington is at a premium and when we tripled our storage space I realized the enormous value and beauty of compact shelving."
